## AMPLITUDE MODULATOR

(57) Abstract:

quadrature amplitude modulator. error of the phase shifter in the coupled circuit to correct the phase amplitude modulator at a linearly signal used as input to a quadrature by correcting a baseband input which a high frequency is handled adjustment in a phase shifter in PURPOSE: To dispense with

COPYRIGHT: (C)1991, JPO& Japio adder 105, then, modulation output baseband signals at the multipliers and they are multiplied by the almost 90° by the phase shifter 104, carriers with phase difference of is changed to apair of orthogonal circuit 101, and are inputted to the appropriately at the linearly coupled signals are linearly coupled CONSTITUTION: Two baseband quadrature amplitude modulator 102, 103, and are synthesized at an 102, 103 in the modulator. A carrier 106, and are inputted to multipliers

the want.

potent - ... It lust is Jufan.
